**DETAILED ACTION**

***Amendment***

1. Receipt is acknowledged of the Amendment filed July 26, 2005.

***Allowable Subject Matter***

2. Claims 1-18 are allowable over prior art.

The following is an examiner's for allowance: Prior art teaches optical bar-code reader, a method of reading a bard code, and a computer program that makes a computer execute, wherein the reader, the method, and the computer program use an optical scanner that optically scans a bar code to obtain optical power of light reflected from white and black bars of the bar code. Prior art additionally teaches obtaining a digital signal corresponding to the bar width of a desired code, by extracting positive and negative delay signals from the differential output of an analog signal. The identified prior art of record, taken alone, or in combination with any other prior art, however fails to teach or fairly suggest the bar-code reader, method of reading a bar code, and computer program for reading a bar code which is disclosed in claims 1-18 of the present claimed invention. Although prior art teaches obtaining a positive and negative signal from differentiation unit, prior art fails to teach additionally teach including a dividing unit which divides the differential waveform into a positive waveform and a negative waveform, a bar-code correcting unit that calculates widths of black bars in the bar code from the positive waveform and the negative waveform to create corrected bar-code data, and lastly, a converter that converts the corrected bar-code data into character data that is an array of numerals and alphabets. The above

not found in prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
